

The US population should be double its present size

Written by Dr. John E. Russell Sr - Last Updated Wednesday, 27 November 2019 21:26

Since 1973, there have been an estimated 312 million abortions in the USA.:

62 million surgical abortions
255 million chemical abortions
312 million total abortions

330 million present population of the USA

If another country had killed half of our people, we would be at war with them.

"The enemy within"
